## Experience

**Solutions Engineer** **August 2026 – Present**
*ServiceNow* *Orlando, FL*

- **Lead 10+ Jumpstart Technical Accelerators**, including Health Assessment, CMDB, and CSDM initiatives, to increase enterprise client product adoption and optimize architecture for enterprise accounts.
- Shortened **time-to-value** for enterprise accounts by **2+ weeks** by establishing cloned sub-production evaluation baselines to uncover architecture gaps, align with platform best practices, and deliver actionable quick wins.
- Designed and presented **tailored technical roadmaps** and architecture governance frameworks for enterprise stakeholders, driving a **15%** increase in platform feature adoption.

**Software Engineer Intern** **January 2025 – August 2026**
*Lockheed Martin* *Orlando, FL*

- Engineered a custom AI chatbot using Genesis AI to parse Jira tasks and automatically generate step-by-step subtasks through webhooks when moved to "Code Review", accelerating **sprint testing** efficiency by **57%**.
- Maintained **6** enterprise **web applications** within a large codebase using **Angular**, ensuring adherence to strict engineering standards and best practices.
- Developed automation scripts and configured updates across **8 enterprise servers** to maintain data integrity and maximize system throughput.
- Executed bi-weekly Agile release cycles by delivering peer-reviewed, well-documented code via **Git workflows**, minimizing technical debt and maintaining high test coverage for enterprise applications.

## Technical & Domain Skills

**Platforms & Solutions:** ServiceNow ITOM, CMDB, CSDM, ServiceNow Impact, Enterprise SaaS
**Customer & Architecture Skills:** Technical Consulting, Customer Success Strategy, Platform Health Optimization, Solutions Engineering, Workflow Automation, Customer Facing
**Frameworks & Tools:** React, Next.js, Angular, Git, Jira, Agile/Scrum, MongoDB, RESTful API, HTTP APIs, Claude Code, LLMs (Large Language Models), Figma
**Languages:** Python, GO, TypeScript, JavaScript, C, PostgreSQL
**Certifications:** ServiceNow Certified System Administrator (CSA), ServiceNow Data Foundations (CMDB/CSDM)

## Projects

**AgentNow** | *Next.js, React, TypeScript, Google Cloud, Python, FastAPI, RAG*

- **2nd place winner** of **ServiceNow's Agentic AI challenge** at Knight Hacks 2025, **surpassing 20+ competitors**.
- Architected a low-latency **Retrieval-Augmented Generation (RAG)** service on **FastAPI**, **Python**, and **Google Cloud**, orchestrating vector search workflows
- Engineered a high-performance **Next.js** interface with real-time state management, enabling users to receive automated recommendations through an end-to-end operational workflow.

**OrlandoHealth** | *Next.js, TailwindCSS, Figma*

- Built a clinician-facing **Next.js** dashboard supporting an end-to-end surgical performance review workflow by developing responsive upload, analyzer, and results pages with **TailwindCSS**.
- Enabled **interactive** surgical **performance review** by visualizing bounding-box overlays, motion trajectories, steadiness metrics, and timestamp-synchronized charts alongside video playback.
- Integrated the frontend with **REST API endpoints** using asynchronous **Fetch API** calls, enabling video uploads, analysis triggering, job-status tracking, and dynamic retrieval of computed surgical metrics.

## Education

**University of Central Florida** **Orlando, FL**
*B.S. Computer Science & B.A. History* *2026*

**Relevant Coursework:** Big Data Analytics, Multi-Threaded Programming, Data Structures and Algorithms, Multivariable Calculus, Matrix and Linear Algebra, Machine Learning
