Experience

Solutions Engineer August 2026 – Present
ServiceNow *Orlando, FL*

- Led 10+ **customer-facing technical engagements** for enterprise clients across Health Assessment, CMDB, and CSDM, translating customer needs into platform recommendations and increasing product adoption by 25%.
- Established cloned sub-production evaluation baselines to identify architecture gaps and support **end-to-end technical delivery** planning, accelerating enterprise time-to-value by 2+ weeks.
- Presented technical roadmaps and system architecture governance frameworks to enterprise stakeholders, translating technical requirements into actionable recommendations and increasing feature adoption by 15%.

Software Engineer Intern January 2025 – August 2026
Lockheed Martin *Orlando, FL*

- Built an **AI-powered workflow** using OpenAI and Llama 3 APIs to parse Jira tasks and trigger automated subtasks through webhooks at code review, reducing sprint testing time from 2 weeks to 3 days.
- Developed automation scripts and configured updates across 8 enterprise servers processing 500GB+ of daily diagnostic telemetry, supporting **large-scale data handling**, **system integration**, and operational reliability.
- Maintained 6 enterprise web applications in a 100k+ LOC Angular codebase, **debugging application behavior** and optimizing state management to reduce component render latency by 35%.
- Delivered peer-reviewed code and technical documentation through biweekly Agile releases and Git workflows, minimizing technical debt and maintaining 92% unit test coverage.

Projects

AgentNow | *Python, FastAPI, RAG, Google Cloud, Next.js, React, TypeScript*

- Won first place in ServiceNow's Agentic AI Challenge at Knight Hacks 2025, outperforming 20+ competitors across 6+ teams.
- Architected a low-latency **RAG pipeline** using Python, FastAPI, Google Cloud, and vector search to reason over retrieved information, achieving 94.2% sentence similarity accuracy.
- Developed an **end-to-end AI workflow** with a Next.js interface and real-time state management, delivering automated recommendations in under 180ms.

OrlandoHealth | *Next.js, TailwindCSS, Figma, REST APIs*

- Built a clinician-facing dashboard for surgical performance review, reducing review completion time from 2 weeks to 2 days.
- Developed video-linked performance visualizations with bounding-box overlays, motion trajectories, steadiness metrics, and synchronized charts, achieving 60 FPS.
- Integrated frontend workflows with **REST APIs** for dynamic retrieval of computed metrics, reducing job-status tracking latency by 45%.

Technical Skills

Languages: Python, Go, TypeScript, JavaScript, C, PostgreSQL, SQL
AI / Agents: Agentic AI, LLMs, OpenAI, Llama 3 APIs, **RAG pipelines**, vector search, workflow automation
Integration / Full Stack: React, Next.js, Angular, FastAPI, REST APIs, HTTP APIs, frontend/backend integration
Enterprise Engineering: Enterprise SaaS, technical consulting, **customer-facing solutions engineering**, system architecture, Git, Agile/Scrum, unit testing, technical documentation
Data / Cloud: Google Cloud, MongoDB, telemetry data, asynchronous API workflows
Certifications: ServiceNow Certified System Administrator (CSA); ServiceNow Data Foundations (CMDB/CSDM)

Education

University of Central Florida Orlando, FL
B.S. Computer Science & B.A. History 2026
Relevant Coursework: Software Engineering (POOSD), Big Data Analytics, Multi-Threaded Programming, Parallel Computing, Data Structures and Algorithms, Machine Learning, Linear Algebra
